Attention!!!
All your personal files (photo, documents, texts, databases, certificates) have been encrypted by a very strong cypher RSA-1024. The original files were deleted. You can check - just look for files in all folders.

There is no possibility to decrypt these files without a special decrypt program! Nobody can help you - even don't try to find another method or tell anybody. Also after n days all encrypted files will be completely deleted and you will have no chance to get it back.

We can help to solve this task for 125$ via ukash/psc pre-paid cards.

What has happened?

During the system scan Antipiracy foundation scanner has detected copyright issues. Please take a look at the list and choose an action: pass the case to a court or settle it in pre-trial order by paying a fine.

How could it happen?

You may have been using file-sharing clients, torrents or downloaded the content in question straight from the website. In any of those cases you have violated the copyright of respective owners. In most countries this kind of action is prosecuted and serious penalties are imposed. Maximum penalties can be five years in prison and up to $250,000 in fines.

Dear Sir/Madame

I write to invite you to join me in Oslo at the Nobel Prize ceremony of Liu Xiaobo. It will take place December 11th at the Oslo City Hall.

As founder and chairman of the board of the Oslo Freedom Forum (a Norwegian human rights organization) I am inspired by the Norwegian Nobel Committee's decision to award the peace prize to a human rights defender.

I hope you can join me in Norway to celebrate human rights and the universal message of Liu Xiaobo.

Best regards

Thor Halvorssen
